## Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136 (a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely. If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## Status

- 1) ☒ Responsive to communication(s) filed on Nov 4, 2002
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.

### DETAILED ACTION

This action is responsive to applicants' amendment and response received November 4, 2002. Claims 21 and 23-33 are currently pending.

#### *Double Patenting*

1. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

2. Claims 21 and 23-33 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-34 of U.S. Patent No. 6,375,685. Although

Art Unit: 1751

the conflicting claims are not identical, they are not patentably distinct from each other because the essential elements of the claims, that is formaldehyde and silicone elastomer are identical.

3. Claims 21 and 23-33 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-20 of U.S. Patent No. 5,885,303. Although the conflicting claims are not identical, they are not patentably distinct from each other because the essential elements of the claims, that is formaldehyde and silicone elastomer are identical.

***Claim Rejections - 35 USC § 102***

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

The rejections of the claims under 35 U.S.C 102 are withdrawn in view of applicants'

amendment and response.

***Claim Rejections - 35 USC § 103***

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person

Art Unit: 1751

having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claims 21 and 23-33 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hendrix et al, US 4,530,874.

Hendrix et al teach fabrics with a glossy smooth appearance and enhanced hand (see abstract). Curable silicone polymers may be used in the finishing composition of the present invention and said polymers may be crosslinked with a crosslinking agent such as formaldehyde (col. 4, lines 58-60 and col. 5, lines 36-47). It would have been obvious to one of ordinary skill in the art to use such a cross-linked silicone polymer in the fabric treating compositions of Hendrix et al as such cross-linked polymers are taught by the reference.

7. Claims 21 and 23-33 are rejected under 35 U.S.C. 103(a) as being unpatentable over Alberts et al, US 4,464,506.

Alberts et al teach organopolysiloxane finishing agents for fabrics (see abstract). The polymerization of the organopolysiloxanes may be started with redox initiators such as formaldehyde and the polymerization reaction may be carried out at elevated temperatures and pressures (col. 4, lines 1-7). It would have been obvious to one of ordinary skill in the art to use formaldehyde to initiate the polymerization of organopolysiloxane finishing agents as such finishing agent polymers are taught by the reference.
